Education

University Institute of Technology RGPV

Bachelor of Technology in Computer Science and Engineering

Oct. 2022 – May 2026

Bhopal, Madhya Pradesh

Relevant Coursework

- Data Structures and Algorithms
- Software Engineering
- Operating System
- Web Development
- Database Management System
- Object-Oriented Programming

Experience

Wyreflow Technologies

Frontend Developer Intern

Dec 2024 – Feb 2025

Bhopal, Madhya Pradesh

- Developed responsive web interfaces using React.js, JavaScript, HTML5, and CSS3 across multiple application features.
- Implemented reusable UI components and responsive layouts for admin panel to maintain consistent behavior across desktop and mobile devices.
- Collaborated with backend developers and senior engineers to debug issues, integrate APIs, and deliver application features in an Agile development environment.

Projects

AI Doctor Receptionist

Python, LLM, FastAPI, PostgreSQL, Intent Routing, Telegram

July 2026

🔄 🔗 📄

- Built an AI-powered clinic receptionist using Python, FastAPI, Telegram Bot API, Groq LLM, and PostgreSQL to automate patient appointment interactions.
- Implemented AI intent routing for appointment booking, cancellation, rescheduling, and general patient queries.
- Integrated SQLAlchemy ORM for persistent appointment management and real-time database operations.
- Deployed the application as a production-ready Telegram-based AI assistant with separate backend services for conversational processing and data management.

Multi-Tenant Point of Sale (POS) Management System

Spring Boot, Java, React, MySQL, JWT

May 2026

🔄 🔗

- Architected and built a multi-tenant SaaS POS platform with shop-level data isolation using ThreadLocal-based tenant context and JWT-embedded shopId claims.
- Implemented stateless authentication with JWT access/refresh tokens (HS256), BCrypt password hashing, and Spring Security filter chain — zero session affinity required.
- Developed responsive React SPA using TypeScript, TanStack Query for server state, React Router v7, and 40+ shadcn/ui components (Radix + Tailwind v4)

MindEcho - Mental Health Journal Application

ReactJS, NodeJS, Gemini API, MongoDB

September 2025

🔄 🔗

- Developed a full-stack responsive web application featuring AI-powered journaling with Gemini API integration, enabling real-time conversational support and habit-improvement recommendations.
- Developed RESTful APIs with Node.js and Express.js for journal creation, retrieval, and user data management.
- Integrated Gemini API-based NLP capabilities to analyze journal entries and generate personalized AI-driven insights.

Technical Skills

Languages: Java, Python, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Git, GitHub, Postman, Vercel, NeonDB, Docker

Frameworks and Libraries: React.js, Next.js, Node.js, Express.js, REST API, PostgreSQL, Tailwind CSS

AI/Backend: LLMs, Gemini API, Groq API, Intent Routing, REST APIs, SQLAlchemy

Databases: PostgreSQL, MongoDB

Leadership / Extracurricular

College Activities

2022 – 2026

- **Football Team Captain** — Led the department football team, fostering teamwork and leadership.
- **Event Volunteer** — Supported coordination of an inter-college table tennis competition.
